

Carl F. Pompei

Mr. Pompei is a senior management executive with more than 25 years of experience as a Chief Executive Officer of three successful high technology companies in California's Silicon Valley.

In 1972, Mr. Pompei founded NBK Corporation, a manufacturer of silicon wafers and microphotolithographic tools for the semiconductor industry, with sales reaching \$15 million. In 1982, he merged NBK's Photomask Division with Sierracin, an AMEX company and sold its Wafer Division to Kawasaki Steel Co. of Japan. Mr. Pompei went on to start Probe Technology Corp. in 1982, merging it four years later with Micro Mask Corp., a NASDAQ company.

Mr. Pompei's entrepreneurial vision continued with his co-founding of Mass Microsystems, Inc., in 1987. A computer peripherals manufacturer of storage and video products for Apple Macintosh computers, he served as President and CEO until taking the company public with an IPO in 1989, with an annual revenue rate of \$25 million. In 1990, the company merged with RAMTEK Corp., a NASDAQ company.

He has served as the President of Pompei International Inc., a management consulting company since 1995 located in Arlington, Virginia. Mr. Pompei works with start-up and emerging high technology companies specializing in finance and corporate management. He additionally serves as a Director and Executive Vice President of AnthroTronix, Inc. of Silver Spring Maryland, a Research and Development company specializing in advanced human-to-computer interfaces for use in military and educational markets

In 1983, during the Reagan Administration, Mr. Pompei served on the Grace Commission, the President's Private Sector Survey of Cost Control. He later was a co-founder of the Private Sector Council in Washington, D.C. Earlier in his career, he held various engineering and manufacturing management positions at Lockheed Missiles and Space Company, General Micro Electronics, American Microsystems and Drexler Technology, after serving in the U.S. Navy as a Guided Missileman.
